## Confetti Machine Instruction Manual

---

Thank you for purchasing or renting the Ideal Confetti Machine from Atlanta Special FX. The Ideal Confetti Blaster is not a toy and should only be operated by adults. Please keep original box and packaging for rental returns.

*First open your package and be sure all the following items are included.*

### Items Included:

1. CO2 hose with brass fitting and CO2 fiber washer (zip tied to brass fitting)
2. Black confetti machine with power cord

### Items Required By User:

1. Liquid CO2 tank with a siphon tube
2. Adjustable wrench

---

### Set Up Instructions:

1. **Remove** the confetti machine from the box and mount to a stable surface using the bolt/screw holes on bottom plate. Be sure confetti machine is secured to keep from tipping over while in operation.
2. **Attach** small, silver female fitting on the hose to the silver fitting on back side of the confetti box. (near power cord). Hand tighten with adjustable wrench. Do not over tighten.
3. **Cut** the zip tie and insert the fiber washer into the brass end of the CO2 hose.
4. **Attach** the brass end of the hose to the Liquid CO2 bottle and tighten with adjustable wrench.
5. **Open** CO2 bottle valve and listen for any leaks. If you have leaks be sure to tighten fittings until leaking stops.
6. **Once** you assess there are no leaks, plug in the confetti machine to a standard 110v plug (wall plug or extension cord)
7. **Now** with the confetti machine plugged in, slowly open the CO2 bottle valve all the way open.
8. **Pre** fill your confetti into the short side/short tube of the confetti machine. You can pre fill with 1-2 lbs of confetti.
9. **Once** you have the desired amount of confetti in the hopper, push the red/black button on the side of confetti machine to launch. You will hear a loud noise and confetti will be launched while button is pushed. When you let off button the confetti machine will stop launching.
10. **With** the button pushed you may insert handfuls of confetti into the short tube on confetti machine until the bottle of CO2 empties
11. Once bottle is empty or you have finished your event, close the valve on top of CO2 bottle. With the valve closed push the launch button on side of machine until all remaining CO2 is released from line. Now with all pressure released, unplug machine and remove the fittings from the machine and tank.

**Warning: DO NOT PLACE HANDS OR FACE OVER THE LONG TUBE OF CONFETTI MACHINE AT ANY TIME. DO NOT LOOK DOWN THE LONG TUBE OF CONFETTI MACHINE UNTIL THE VALVE IS CLOSED AND ALL CO2 IS BLED FROM THE HOSE.**

(To bleed leftover CO2 from hose, close the valve on CO2 bottle and push the launch button on side of confetti machine until all remaining pressure has been released)
